

LMA Emergency Preparedness Committee

The LMA Emergency Preparedness Committee (EPC) is comprised of emergency planning representatives from MASCO member institutions. Committee members meet monthly, along with representatives from the city of Boston emergency first responder community, to exchange information, share best practices and plan collaboratively to enhance the institution's ability to prepare for, respond to and recover from disasters.

The committee is administered by MASCO Emergency Preparedness staff. Each year a chairperson is elected to guide the development of annual goals and objectives that are reflective of collective needs. The annual goals and objectives help formulate meeting agendas, training program content and emergency preparedness exercises.
